

COVID-19 Camper Screening

Girl Scouts of Southern Nevada is committed to providing a safe environment for girls, volunteers, families, and the greater community. As we are excited to begin our summer programs, it is important that we follow national, state, and local guidance to help minimize the spread of COVID-19. We want to ensure our campers and staff have a COVID free summer experience. **This form is required to be completed by parent/caregiver 14 days prior to camp and turned in during camp check-in**

Parent/caregiver please initial in the box by each statement:

- Completed a health check of my camper and agree they will stay home** if my Girl Scout or household members show any of the following symptoms-
 - Fever (100 °F or above)
 - Cough
 - Shortness of breath
 - Sore throat
 - Headache
 - Muscle aches
 - Loss of smell or taste
- My camper understands they will follow good hygiene practices while at camp.**
 - Wash hands thoroughly for 20 seconds or use hand sanitizer
 - Cover coughs and sneezes with an elbow or tissue and throw away after use
- My camper understands they are required to wear a face covering or mask during their stay at camp.** Exceptions will be during eating, sleeping, showering, and certain camp activities.
- My camper has not traveled by air or traveled outside the state of Nevada within the last 14 days.**

Start date of Temperature/Symptom check:							
Week 1	Day 14	Day 13	Day 12	Day 11	Day 10	Day 9	Day 8
Symptom/Temp °F							
Week 2	Day 7	Day 6	Day 5	Day 4	Day 3	Day 2	Day 1
Symptom/Temp °F							

Our signature indicates that we completed this health screening daily for 14 days prior to camp and to the best of our ability. We understand that arriving to camp healthy is vital to a healthy camp for all campers.

Camper Signature _____ Date _____

Parent/Guardian Signature _____ Date _____

By typing your name in the signature box when submitting electronically, you indicate your acknowledgment that you are bound to this agreement.

The Coronavirus disease of 2019 (COVID-19) is thought to spread mainly from person to person, mainly through respiratory droplets produced when an infected person coughs, sneezes, or talks. These droplets can land in the mouths or noses of people who are nearby or possibly be inhaled into the lungs. Spread is more likely when people are in close contact with one another (within about 6 feet). Because it is a new virus, scientists are learning more each day. Although most people who have COVID-19 have mild symptoms, COVID-19 can also cause severe illness and even death. Some groups, including older adults and people who have certain underlying medical conditions, are at increased risk of severe illness. As with any social activity, participation in Girl Scouts could present the risk of your Girl Scout contracting COVID-19. While the Girl Scouts of Southern Nevada takes every safety and preventative precaution recommended by the Centers for Disease Control and Prevention (“CDC”) as well as State and local authorities, Girl Scouts of Southern Nevada can in no way represent, warrant or guarantee that COVID-19 infection will not occur through participation in troop or council programs.
